## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-21, drawn to a molding process, classified in class 264, subclass 136.
  - II. Claims 22-27, drawn to composite tape, classified in class 428, subclass 298.7.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as, after pyrolyzing the binder coating said fibers with a resin and pulling said coated fiber through a curing die.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
